#### WAS IST ZU BEACHTEN, WENN DER MFR-CODE ODER ABER KEIN FARBTONVERMERK IM FAHRZEUG GEFUNDEN WIRD:

1. Sofern das Serviceheft des Fahrzeuges verfügbar ist, sollte der Farbtonname und/oder die Codierung dort vermerkt sein. Anhand dieser Information kann überprüft werden, ob der Farbton als Rezeptur zur Verfügung steht.
2. Sollte diese Information im Serviceheft fehlen, wird die Chassisnummer benötigt. Der Color Service kann sich mit der Chassisnummer an BMW wenden, um den Farbton zu identifizieren.
3. Im Fahrzeug kann sich auch eine Codierung befinden, die mit „FE“ oder „FQ“ beginnt. Anhand dieser Nummer kann der Farbton ebenfalls bestimmt werden.
4. Ein normaler Serienfarbton kann auch als Sonderfarbton ausgewiesen werden, wenn er sich auf einem anderen Modell befindet (--> siehe Abbildung).

**DK**

#### HVAD SKAL MAN GØRE I TILFÆLDE AF FARVEKODE 490 ELLER OVERHOVEDET INGEN KODE I BILEN?

1. Hvis der er en servicebog til rådighed, vil farvekoden og/eller farvenavnet stå i den. Med denne information kan du kontrollere om farven allerede er udviklet.
2. Hvis denne information ikke er i servicebogen, må man bruge stelnummeret. Med stelnummeret kan Color Service kontakte BMW for at finde ud af, hvilken farve, bilen er malet i.
3. Det er også muligt, at der står en kode, begyndende med FE eller FQ i bilen. Med denne kode er det også muligt at finde farven.
4. En normal serie farve kan også være angivet som en special farve, hvis den bliver anvendt på en anden model (--> de billede).

**E**

#### ¿ QUE HACER EN EL CASO DE QUE EL CODIGO DEL COLOR SEA 490 O NO HAYA NINGUN CODIGO EN EL COCHE ?

1. Primer paso = el cliente le pregunta a su concesionario / servicio oficial el nombre/o código del color. Esta información está en el libro de servicio. Con este nuevo código y/o nombre del color podemos comprobar si tenemos el color desarrollado.
2. Segundo paso = cuando el cliente no sabe el concesionario / servicio oficial (ejemplo: coche de segunda mano) o el código especial no está en el libro de servicio o el concesionario / s.o. no puede ayudarnos: entonces pedir al cliente el número de chasis.
